### Type 3768 Inductive Limit Switch for pneumatic control valves

#### Application

Limit switch with two incorporated inductive switches and optionally one 3/2-way solenoid valve for attachment to pneumatic control valves

**Rated travels from 7.5 to 120 mm**

The limit switch is equipped with two inductive proximity switches which supply a signal when the valve travel exceeds or falls below an adjusted limit value.

Optionally, the limit switch is also available with an integral 3/2-way solenoid valve which registers a binary signal issued by control equipment and converts it into a binary signal pressure. When the solenoid valve is de-energized, the actuator moves the valve to the fail-safe position.

- It is possible to override all the limit contacts. They can be adjusted to be either an NC or NO contact.
- Versions for use in hazardous areas in type of protection intrinsically safe Ex ia IIC T6 are available (refer to the summary of explosion protection approvals).
- Direct attachment to Type 3277 Pneumatic Actuator
- Attachment to actuators according to IEC 60534 (NAMUR)
- Attachment to rotary actuators according to VDI/VDE 3845

For more information on the selection and application of positioners and limit switches, refer to Information Sheet

▶ T 8350.

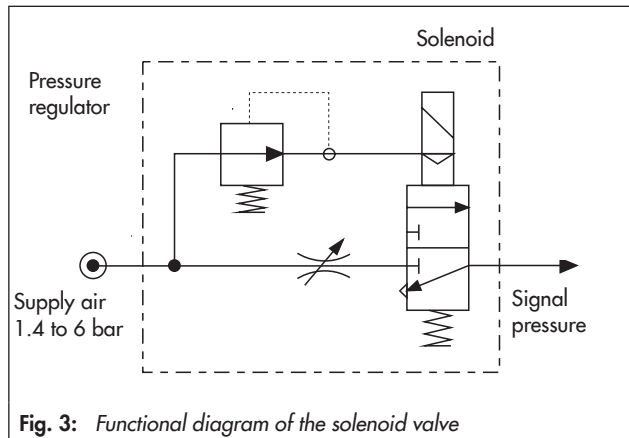

**Fig. 1:** Type 3768 Limit Switch

**Fig. 2:** Type 3768 Limit Switch with opened cover

### Principle of operation (Fig. 3 and Fig. 4)

When the limit switch is attached to a control valve, the valve travel is transmitted via the pin (1.1) to the lever (1) of the actuator. Any change in travel is converted into a rotary motion of the shaft (2). The shaft (2) is fitted with two adjustable metal tags (4) which operate the associated proximity switches (5).

The operation of the inductive limit switches requires switching amplifiers to be connected in the output circuit. When the tag (4) is located in the inductive field of the switch, the switch assumes a high resistance. When it moves outside the field, the switch assumes a low resistance.

When the integrated solenoid valve is energized, supply air is applied to the actuator. The speed of air supply is adjustable at a restriction. When the solenoid valve is de-energized, the actuator is vented and the control valve moves to its fail-safe position.

**Table 1: Technical data**

Travel range	Direct attachment to Type 3277 Actuator: 7.5 to 30 mm Attachment according to IEC 60534 (NAMUR): 7.5 to 120 mm		
Inductive proximity switches <sup>3)</sup>	2x SJ2-SN		
Control circuit	Specifications corresponding to connected switching amplifier		
Hysteresis at rated travel	≤ 1 %		
Permissible ambient temperature	-20 to 80 °C with plastic cable gland -45 to 80 °C with metal cable gland The limits in the type examination certificate additionally apply to explosion-protected versions.		
<b>Solenoid valve</b>			
Supply air	Supply air: 1.4 to 6 bar (20 to 90 psi)		
Input	Binary DC voltage signal		
Nominal signal	6 V DC	12 V DC	24 V DC
Signal '0' (no response) <sup>1)</sup>	≤ 1.2 V	≤ 2.4 V	≤ 4.7 V
Signal '1' (response) <sup>2)</sup>	≥ 5.4 V	≥ 9.6 V	≥ 18.0 V
Coil resistance R <sub>i</sub> at 20 °C	2909 Ω	5832 Ω	11714 Ω
K <sub>v</sub> coefficient	0.14 m <sup>3</sup> /h		
Air consumption	'OFF' ≤ 60 l <sub>n</sub> /h · 'ON' ≤ 10 l <sub>n</sub> /h

## Dimensions in mm

**Table 3: Materials**

Housing	Die-cast aluminum, chromated and plastic coated
External parts	Stainless steel 1.4571 and 1.4104

## Electrical connections

## Ordering text

Type 3768-... Inductive Limit Switch  
(see article code on page 3)

## Additional specifications

- Direct attachment to Type 3277 Actuator (120 to 700 cm<sup>2</sup>)
- Attachment according to IEC 60534 (NAMUR)
- Travel: ... mm, if applicable, rod diameter: ... mm
- Attachment to rotary actuators
- Opening angle: ...  
Single-acting or double-acting actuator

## Accessories

### Adapter ½ NPT for electrical connections

- Filter check valve in housing with G ¼ thread
  - Polyamide, IP65 degree of protection
  - 1.4301, IP65 degree of protection
  - Polyamide, NEMA 4 degree of protection
  - 1.4301, NEMA 4 degree of protection
